General Description

The Device Explorer software searches a network for connected devices, and displays them in a list from which you can monitor the connection status, and run the various utility softwares for each device.

- The utility software* associated with each displayed device can be invoked.

* : The following utility softwares can be invoked from Device Explorer.

Embedded Web Page : Used to view or edit device settings. Requires that Internet Explorer is installed. (Typically installed by default with the operating system.) (Embedded Web function is not available for DP-8060/8045/8035, and DP-8020P/8020E/8016P.)

Device Monitor : Shows the detailed status of devices, and displays notification when an operation completes or errors occur. Only available if Device Monitor is installed.

Network Configuration Editor : Used to view or edit device parameter settings. Only available if Network Configuration Editor is installed.

Network Address Book Editor : Used to view or edit device address books. Only available if Network Address Book Editor is installed.

Memo

System Requirements

- Personal Computer : IBM PC/AT and compatibles (CPU Pentium II or greater is required, Pentium 4 or greater is recommended)
- Operating System : Windows 98*1, Windows Me*2, Windows NT 4.0*3 (With Service Pack 3 or later is required), Windows 2000*4, Windows XP*5, Windows Server 2003*6
- System Memory : The minimum recommended Memory for each OS is as follows:

  Windows 98, Windows Me : 128 MB or greater

  Windows 2000, Windows XP,
  Windows NT 4.0,
  Windows Server 2003 : 256 MB or greater
- Free Disk Space : 200 MB or greater
- CD-ROM Drive : Used for installing the software and utilities from the CD-ROM.
- Interface : 10Base-T/100Base-TX Ethernet port

*1 Microsoft® Windows® 98 operating system (hereafter Windows 98)
*2 Microsoft® Windows® Millennium Edition operating system (hereafter Windows Me)
*3 Microsoft® Windows NT® operating system Version 4.0 (hereafter Windows NT 4.0)
*4 Microsoft® Windows® 2000 operating system (hereafter Windows 2000)
*5 Microsoft® Windows® XP operating system (hereafter Windows XP)
*6 Microsoft® Windows Server ™ 2003 operating system (hereafter Windows Server 2003)

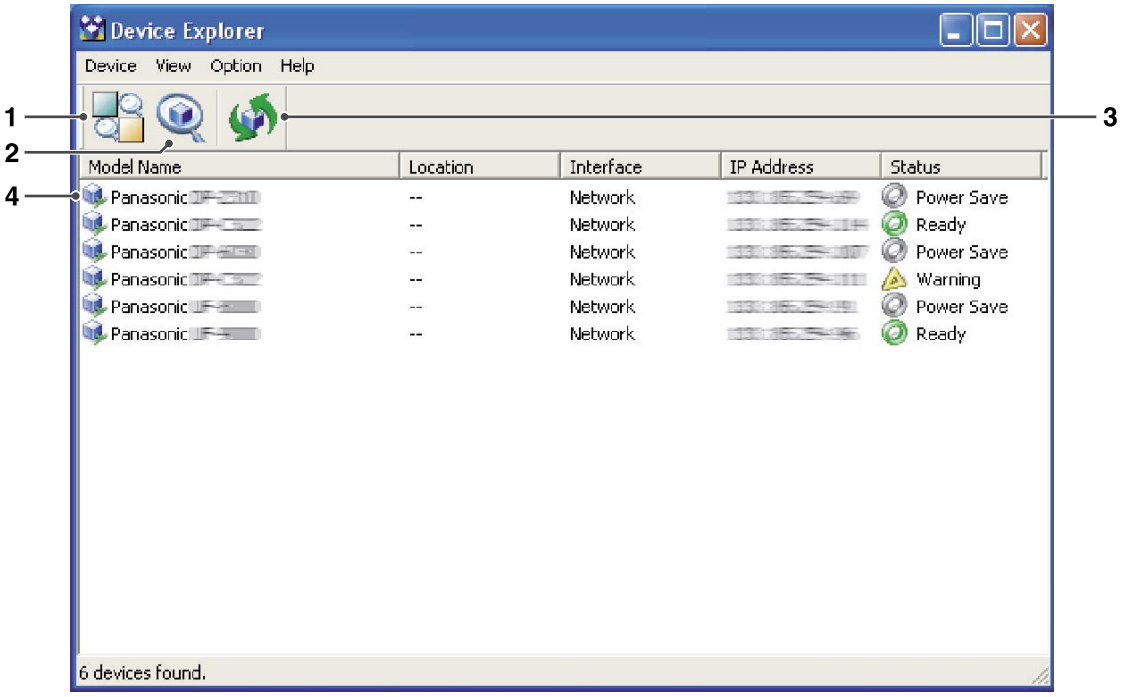

Memo

Main Window

From the **Start** menu, select **All Programs** → **Panasonic** → **Panasonic Document Management System** → **Device Explorer** to open it. (i.e. Windows XP)

The Device Explorer searches for all network connected devices associated to the computer, and displays them in a list.

1. **button**
   Specifies the search constraint such as, the type of devices, the address range, and other requirements. (See page 12)

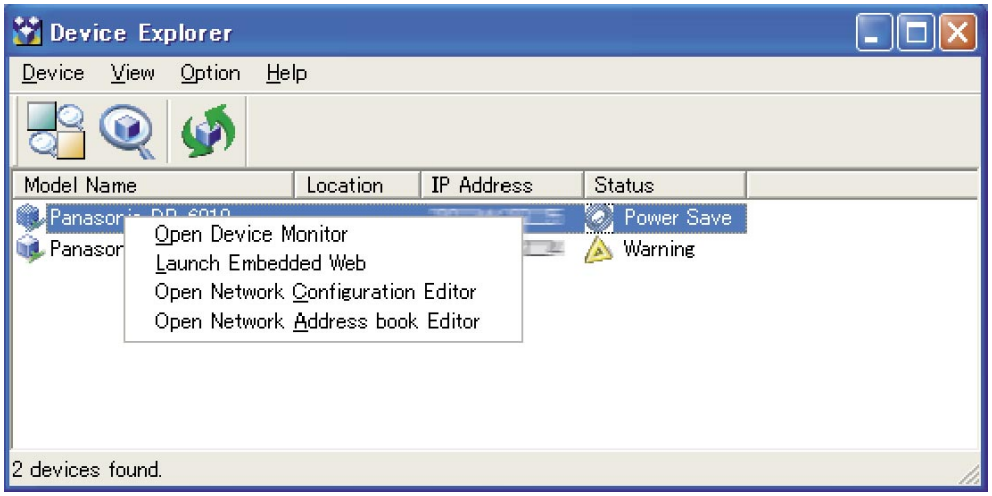

2. **button**
   Searches for all devices connected on your network. The devices found by this search appear in the device list. (See on page 11)

3. **button**
   Refreshes the device list with the latest information.

4. **Device list**
   Displays a list of the devices found by the search, including each device's **Model Name**, **Location**, **IP Address**, and **Status**. The items shown on the list are changeable with the Customize menu. (See page 13)

Basic Operations

Double-clicking on a device in the Device Explorer opens the Device Monitor.
Likewise, right-clicking on a device opens a menu from which you can run various Panasonic-DMS applications.

- **Open Device Monitor**
  Displays the connection and device status of connected devices, and notifies the user of events such as when an error occurs, or the print job finishes. Device Monitor also shows the level of consumables, such as toner and paper.
- **Launch Embedded Web**
  This opens a browser and connects to the web server of the network printer. The device settings are adjustable with the browser.
- **Open Network Configuration Editor**
  This uses the network to edit settings for all functions in the connected device (printer, copier, scanner, or fax parameters).
- **Open Network Address Book Editor**
  Manages the address book of devices connected to the network.

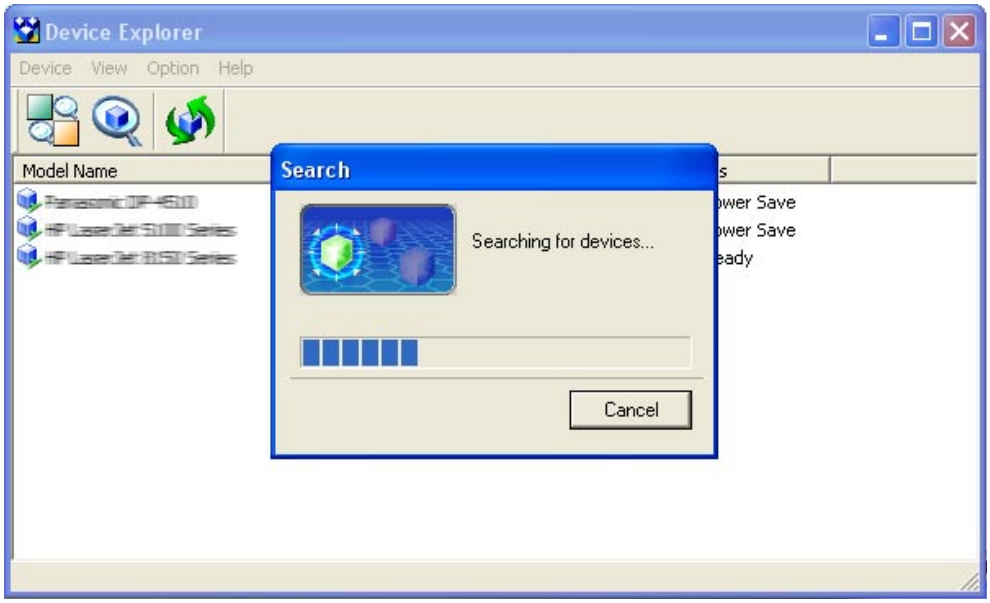

NOTE

Refer to the Operating Instructions in the Panasonic-DMS application relevant to the operation you are interested in.

- ***Device Monitor***
  Refer to the Operating Instructions. (For Device Monitor)
- ***Embedded Web***
  Refer to the Operating Instructions. (For Web Server & Embedded Web Launcher)
- ***Network Configuration Editor***
  Refer to the Operating Instructions. (For Network Configuration/Address Book Editor)
- ***Network Address Book***
  Refer to the Operating Instructions. (For Network Configuration/Address Book Editor)
- *Embedded Web function is not available for DP-8060/8045/8035, and DP-8020P/8020E/8016P.*

Searching Devices

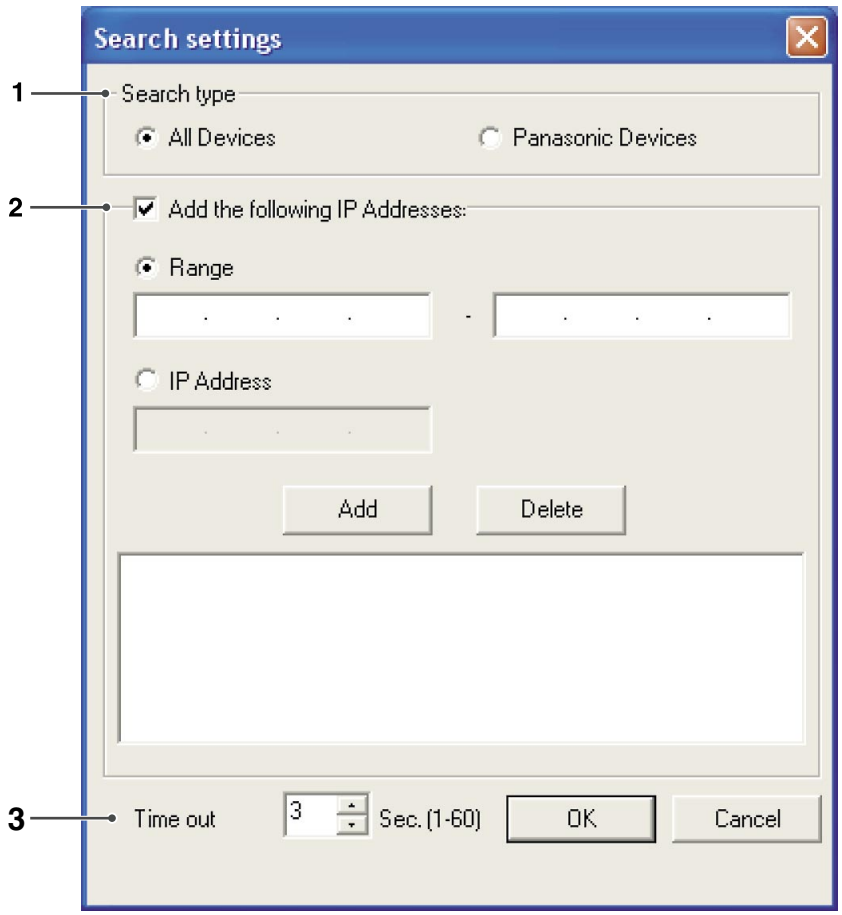

Clicking the button searches for all network connected devices associated to the computer, and displays the results in a list.

NOTE

*Make sure that the Community Name (1) on the device is set to **public** when searching the network for devices. If the Community Name (1) is set to a different name, it will be excluded from the search.*

Clicking the button allows you to specify the search criterion.

1. **Search type**
   Select the type of devices to search for.

All Devices	Search for all devices.
Panasonic Devices	Only search for Panasonic devices.

2. **Add the following IP Addresses**
   Add a device IP address, or the IP address range.

Range	Specify a range of IP addresses to search for devices. Clicking the Add button adds the specified IP address range.
IP Address	Specify an IP address to search for devices. Clicking the Add button adds the specified IP address.

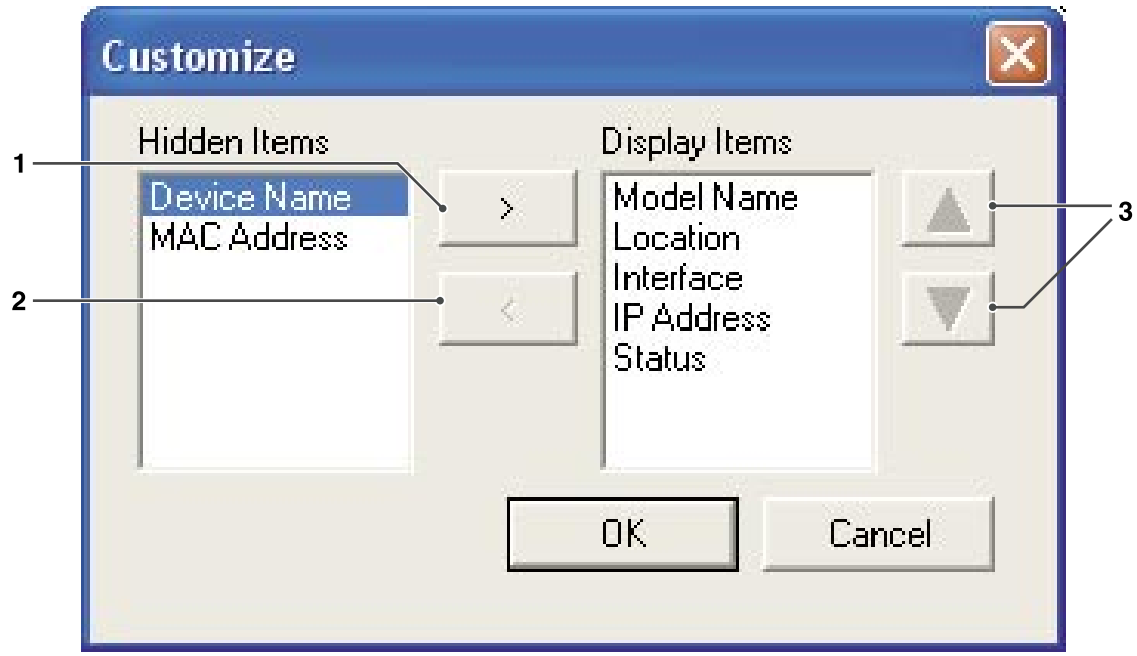

Add button Add the specified IP address to the list of search addresses.

Delete button Remove the selected IP address from the list of search addresses.

3. **Time Out**
   Set the search time out in seconds.

Customize Window

Select **Customize** in the **Option** menu to change the items that appear in the device list and the order in which they appear.

1. **> button**
   Moves the selected items from the **Hidden Items** list to the **Display Items** list.
   The items in the **Display Items** list are displayed in the device list of the Device Explorer.

2. **< button**
   Moves the selected items from the **Display Items** list to the **Hidden Items** list.
   The items in the **Hidden Items** list are not displayed in the device list of the Device Explorer.

3. **▲ / ▼ button**
   Changes the order of the selected items in the **Display Items** list.
   The items are displayed in the Device Explorer device list in the same order as they appear in the **Display Items** list.

NOTE

The Device Explorer settings are saved for the currently logged-on user.
Settings created by other users are not listed. However, for Windows 98/Windows Me, settings are saved on a per-OS basis.
